

# Dilmar Oil Company

# Industrial Gear Oil EP 150

## Gear Oil

### Product Description

Dilmar Industrial EP Gear Oils are premium quality, extreme pressure gear oils for use in industrial service. These lubricants have good oxidation and thermal stability, are noncorrosive to gear and bearing materials, provide excellent rust protection, and resist oil thickening and deterioration for long service life. Excellent demulsibility and nonfoaming.

### Recommended For:

Dilmar Industrial EP Gear Oils are designed for use in conditions of high temperature and extreme pressure including enclosed gear systems, such as spur, bevel, herringbone, worm, and hypoid gears, chain drives, sprockets, slide guides and ways, and bearing sets. Misting oils and rock drill oils are other applications for these products. These fluids satisfy the requirements of U.S. Steel 224, AGMA 250.04, AGMA 251.02, and API GL-1 through GL-3 specifications.

Typical Properties	150
Viscosity @ 40° C, cSt	149.7
Viscosity @100° C, cSt	14.8
Viscosity Index	98
Pour Point, °F	-20
Flash Point, °F	420
API Gravity	26.7
Timken	65
Copper Corrosion	1
AGMA No.	4EP
